SHARMIL KALLICHANDA

Durham, NC | sharmilkn@gmail.com | +1-714-951-4404 | LinkedIn | Portfolio | GitHub

Cloud Consultant turned AI/ML leader with 9+ years delivering production-grade enterprise systems and a Master's in AI (Duke, 2026). Proven track record managing cross-functional engineering teams across global time zones, defining technical roadmaps, and shipping high-quality software on schedule. Hands-on background spanning ERP systems, process flows, data migration and EDIs and now focused on AI platform engineering and LLM evaluation frameworks. Experienced using AI to accelerate development and evaluation.

TECHNICAL SKILLS

AI Platform & Evaluation: LLM Evaluation & Observability, RAG Pipelines, LLM, Deep Learning – CV, NLP, GenAI, Recommendation Systems, Prompt Engineering, Model Validation, Reinforcement Learning, SHAP/XAI
Data Engineering: Python, SQL, Data Migration, Oracle Cloud, Vector Databases (ChromaDB), LangGraph, Firecrawl
MLOps & Infrastructure: LangFuse, MLflow, CI/CD, Cloud Platforms, Agile Delivery, Experiment Tracking
Frameworks & Libraries: PyTorch, TensorFlow, scikit-learn, XGBoost, OpenAI APIs

RESEARCH & AI PROJECTS

LLM Evaluation & Observability Framework | Capstone:| 2025–26

- Architecting an end-to-end LLM evaluation and observability pipeline using LangGraph, ChromaDB, LangFuse, and OpenAI APIs.
- Automating web data extraction via Firecrawl; implementing KPI-driven RAG analysis with structured YAML reporting.

Explainability Guided Model Routing | Duke University | 2025

- Built an XAI driven system routing inputs to the lowest-compute model tier using SHAP, Grad-CAM, and Gradient Boosting, achieving compute reduction and 73% latency improvement. Designed, coded, and validated the full ML pipeline end-to-end.

Research Assistant – Computer Vision | Duke Trust Lab × OpenAI | 2026–Present

- Developing a deep learning framework for real-time facial detection; applying MLOps best practices on large-scale unstructured video datasets.

Multi-Modal AI Assistant | Duke AI Hackathon – Winner, Robotics Track | 2025

- Built an embedded multimodal system (LLM + computer vision) on Raspberry Pi for autonomous navigation under a 24-hour sprint, demonstrating fast iteration in early-stage AI environments.

PROFESSIONAL EXPERIENCE

Senior Cloud Consultant – Oracle SCM Cloud | Oracle India | Jul 2017 – Mar 2024

- Managed and mentored cross-functional engineering teams of across NAAC & APAC, delivering 7+ Fortune 500 ERP implementations with over 90% client satisfaction.
- Defined technical roadmaps and coordinated across engineering, product, and business stakeholders to align delivery with platform goals.
- Served as the lead for 13+ mission-critical EDI integrations; conducted client requirement gathering sessions, design reviews and testing cycles to deliver within the 6 month tight deadline.
- Maintained large-scale data migration pipelines processing millions of records for Oracle SCM Cloud.
- Reduced procurement cycle times 30–40% through backend workflow automation; deployed cross functional modules including Oracle Inventory & Demand Planning.
- Partnered with cross-functional teams in fast-paced, ambiguous environments to make timely architecture and delivery decisions.

Software Developer | Tata Consultancy Services | Dec 2012 – May 2015

- Developed financial reconciliation systems for banking clients, configured process flows ensuring regulatory compliance.

EDUCATION

Duke University, Pratt School of Engineering | Durham, NC | *08/2025 - Present*
Master of Engineering in AI for Product Innovation | *Winner, Duke AI Robotics Hackathon*
Xavier Institute of Management & Entrepreneurship | Bangalore, India |06/*2015 – 05/2017*
Master of Management
Visveswaraya Technological University, BNMIT | Bangalore, India |06/*2008 – 05/2012*
Bachelor of Electrical & Electronics Engineering
